```java
1  import lt.vtvpmc.Article;
2
3  public class ArticleImpl implements Article {
4      private String heading; //deklaruojam parametrus
5      private String brief;
6
7      public ArticleImpl(String heading, String brief) { //sugeneruotas konstruktorius
8          this.heading = heading;
9          this.brief = brief;
10     }
11
12     @Override
13     public String getHeading() { //geteris (ne automatinis)
14         return this.heading;
15     }
16
17     @Override
18     public String getBrief() { //geteris (ne automatinis)
19         return this.brief;
20     }
21 }
22
```
